

Traumasoft Improves the EMS Billing Process from Start to Finish with

Traumasoft's new partnership with Nsure is solving the unique revenue and billing hurdles EMS agencies continually encounter... all while driving more revenue!

Ambulance providers often lack complete and accurate patient demographic and insurance information at the time of transport for their emergency and even some non-emergency trips. Challenges in checking deductibles, proving medical necessity, and obtaining prior authorizations are now a thing of the past with

Traumasoft's new integration with Nsure!

By giving billers greater access to critical data without having to leave the Traumasoft system, billers can quickly and accurately identify active patient insurance, real-time demographic verification and credit checks.

The result....

- Cleaner patient data
- Faster reimbursement
- Simpler self-pay management
- Reduction in manual processes and return mail
- Minimized risk of rejected claims and write-offs
- Reduction in operational costs
- Up to 12% more revenue and improved cash flow

Ensure correct patient demographics

Discover active insurance coverage

Analyze self-pay

Verify insurance eligibility

Nsure delivers actionable data and workflow to increase cash, maximize reimbursement and resolve patient balances all through the Traumasoft EMS Management system.
