TRAUMAsoft

REAL-TIME DYNAMIC ROUTING

FOR NON-EMERGENCY TRIPS

PROBLEM

Daily scheduling of non-emergency trips
Dispatch
Billing
Compliance
Driver Communication

RESULT

Trips run late
Waste of time and money
Poor workflow
Underutilized/under-capacity vehicles
Non-productive units
Manual mistakes

GOAL

- Create an optimized, automated, real-time schedule, minimizing "no ride" miles and overall distance traveled while maximizing revenue miles.
- Optimally calculate pick-up time, assigning trips based on trip criteria, minimizing mistakes and non-productive time on units.
- Real-time recalculation when a new trip is added with the ability to display multiple trips on a map, incorporating patient requirements.
- Integrate with trip brokers and provide automatic trip reminders and a mobile app.

SOLUTION

With Traumasoft's Real-Time Dynamic Routing, **dynamically dispatch in real-time without the risk of human error,** creating a "real-time" multi-trip schedule capacity for your non-emergency trips to:

save manpower
increase utilization
improve efficiency
maximize profitability
reduce human error

With the ability to dynamically route non-emergency trips to maximize capacity, this solution will revolutionize your organization.
