

Achieve agility and efficiency with...

Traumasoftware's Trip Router

Traumasoftware's Trip Router gives dispatchers the ability to pre-plot and optimize trips to create efficiencies in routing pre-scheduled and non-emergency trips.

The user-friendly system provides a complete map overview of the transportation needs, allowing the dispatcher to visualize and create a route for a specific shift.

Trip Routing
Pickup Date: 09/01/2018 | Pickup Time Between: 08:00 - 13:00 | Calltype: Wheelchair Unit | LOS: Any | Include Assigned: | Get Trips

Controls
All Legs Test Route Legs Test Route (consolidated)

Validation
Validate Test Route

Validation Status Complete
Errors :
Run# will be 84 minutes 41 seconds late to pickup
Run# will be 207 minutes 33 seconds late to dropoff
Run# will be 135 minutes 52 seconds late to dropoff
Run# will be 135 minutes 49 seconds late to pickup
Run# will be 264 minutes 2 seconds late to dropoff
Run# will be 242 minutes 16 seconds late to pickup
Run# will be 268 minutes 57 seconds late to dropoff
Run# will be 263 minutes 2 seconds late to pickup
Run# will be 262 minutes 55 seconds late to dropoff

The validation tool allows you to “test” the route to determine timing and optimization, giving you the flexibility to maximize the efficiency of your fleet.

Trip Router:

- Improves On-time performance
- Reduces fuel and maintenance costs on fleets
- Optimizes unit hour utilization
